Vocera Smartbadge

The Vocera Smartbadge is a wearable communication device that enables user agility and can accelerate outage efficiency. Small, lightweight, the Smartbadge redefines communications by bringing together voice calling, secure messaging, and alerts and alarms in a lightweight wearable.

Bring the team in. Even when they're out.

Just say a name, a role, or a group name to connect instantly with users inside or outside the facility. There's no need to remember phone numbers or keep track of who's on shift. The Smartbadge responds to more than 100 voice commands through an optimized speech-recognition engine.

You can send broadcast messages easily to rapid response groups. A dedicated panic button allows you to summon help instantly.

Lightweight. Lightning fast.

The Smartbadge is light enough to wear comfortably. Clip it to your clothing for hands-free operation or hold it to your ear for privacy. Use the touchscreen keyboard to find contacts quickly and send secure text messages. Read messages as easily as with a smartphone, and see important, actionable information at a glance on the ample screen.

Built for ease. Built for agility.

It enables users to:

- Make and answer calls hands-free
- Receive alert and alarm notifications in tandem with outage information for real-time situational awareness and to help reduce interruption fatigue
- Connect with the right person simply by saying a name, role, or group name

Built for privacy. Built for convenience.

In addition to voice activation, the Vocera Smartbadge also allows users to:

- Send and receive secure text messages
- Read messages as easily as with a smartphone
