Quick Connect Camera Mounting System

No more delayed camera deployments due to visits to the hot tool room and the time it takes for a change in mounts. Do you need a mag mount to be a trigger or visa versa? The new I.I.S. Quick Connect Camera Mounting System is our solution. In less than 30 seconds without any tools required, you can change out camera mounts on the fly.

Quick Connect Camera Mounting System

The Quick Connect has a spring loaded release that allows you to push, twist and remove the mount you want to replace. Push the new mount in, twist, then tighten the post's built in nut to lock the mount into place
