INNOVATIVE INDUSTRIAL SOLUTIONS

Unreal Innovation. Real Solutions.

February 1, 2024

Innovative Industrial Solutions, Inc. is pleased to announce the 23rd Annual Remote Monitoring Technologies & Wireless Devices Benchmark Meeting is being held May 13th-16th, 2024, at the Hotel Hot Springs. This is a face-to-face meeting.

The intent of this meeting is to provide you with a format to benchmark many of the current Remote Technologies in the nuclear industry today and some that will be implemented soon to assist with the goals and objectives of the Nuclear Industry!

The primary focus of this meeting will be Remote Communication Technology, Training on Remote Technologies, and New Innovative Technologies. Several current utility users will share their past and present experiences with you, covering IP Video, Audio, Telemetry, and Wireless Sensor technology implementation, explaining how it has improved their current CRE numbers by improving time management.

We will also present our new SMART GATE, utilizing our WAM technology to automatically assist RP in managing frequently changing dose rates! Our new Turnstile will be available for inspection also.

Several other vendors will also be in attendance, demonstrating their technologies in the exhibit room and making presentations of their technology's benefits.

IIS will provide software and hardware training to all current IIS product users; registration for training is required. This training will be conducted on the 16th the last day of the meeting. The cost for this training is $500. The meeting attendee fee is $1000 and does not include training. Our costs have risen with our economy; we regret the necessity of raising our fees. CE credits will also be available for this meeting attendance.

Location:
Hotel Hot Springs
305 Malvern Ave
Hot Springs National Park, Ar 71901

$129.00 Single Occupancy
 $139.00 Double Occupancy
